About the front cover:

Various properties surveyed as part of the NSHS State-Owned Buildings Survey.

From top to bottom, left to right, the buildings depicted are as follows:

Department of Aeronautics – Harvard State Airfield Wooden Hanger
Department of Corrections – Nebraska Correctional Center for Women Barn
Department of Roads – State Patrol Building
Nebraska State College System – Hildreth Hall
Nebraska State Historical Society – Historical Society Headquarters
Game and Parks Commission – Ash Hollow State Historic Park Rock School House
Administrative Services – White Hall Mansion
Department of Health and Human Services – Grand Island Veteran's Home World War II Memorial Building

The activity that is the subject of this report has been financed with funds from the National Park Service, U.S. Department of the Interior. However, the contents and opinions do not necessarily reflect the views and policies of the U.S. Department of the Interior or the State of Nebraska.

This program receives federal financial assistance for identification and protection of historic properties. Under Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975, as amended, the U.S. Department of the Interior prohibits discrimination on the basis of race, color, national origin, disability, or age in its federally assisted programs. If you believe you have been discriminated against in any program, activity, or facility as described above, or if you desire further information, please write to:

Introduction

The Nebraska State Legislature stated in 1986 that the preservation of buildings owned by the state "will enrich the life for Nebraska's citizens both today and for future generations."[1] State agencies and departments can be proud of their role in shaping this state. The Nebraska State Historical Society affirms that the legacy of state government can be expressed in historic places held by its agencies and departments.

Project Background

The Nebraska State Historical Society commissioned this survey of state-owned buildings, the second survey to be conducted since 1986. The purpose of the project was to document each existing state-owned building and to assess each building in terms of potential historic significance.

A previous survey of state-owned historic buildings was extremely dated, and many buildings have since been demolished or altered. Many others have now reached or are nearing fifty years of age, and potentially are historically significant. Therefore, this project was conducted to update and build upon the previous survey.

Buildings were evaluated using generally-accepted standards for evaluating significance, as established for the National Register of Historic Places and promulgated by the U.S. Department of the Interior, National Park Service. This survey consisted of identifying properties built before 1968; this date was employed so the survey project could foresee properties that would meet, within the next five years, the generally-accepted fifty-year threshold for determining historical or architectural significance. Some modest small scale buildings were included in the study. These may not qualify individually as "state-owned historic buildings," but rather contribute to a potential historic district. Information reviewed for the surveyed properties included photographs, property descriptions, and relevant historical research materials.

Legislation Related to State-Owned Historic Buildings

When the Nebraska State Legislature enacted LB 563 in 1986, it stated that "(e)fforts should be made by the state to identify, preserve, maintain, and restore such historic structures whenever possible."[2] In response to this legislation, Nebraska Revised Statutes 72-808 through 72-810 were entered into state statutes.

These statutes provide for the State Historic Preservation Office (SHPO), a division of the Nebraska State Historical Society, to notify all state agencies or departments as to designation of state-owned historic buildings in their ownership or control. This survey, therefore, will assist individual state

1. Laws 1986, LB 563, NRS 72-808.
2. Ibid.

agencies or departments in identifying historic buildings under their ownership or control and planning for their rehabilitation.

In addition, Nebraska Revised Statute 72-815(2) requires state agencies to inform the Nebraska SHPO of plans or intent to demolish a state-owned historic building. A minimum thirty-day notice of potential demolition or disassembly is required to allow the SHPO the opportunity to photograph or record a building prior to commencing any action. NRS 72-815(3)b allows state-owned historic buildings listed in the National Register of Historic Places to be sold to a not-for-profit community organization which will maintain the historic integrity of the building. See Appendix A for Nebraska Revised Statutes 72-808 through 72-810, and 72-815.

Fifteen state agencies or departments hold property and approximately ten have major holdings. The following agencies and departments hold property and have been included in this survey.[3]

- Administrative Services, State Building Division
- Department of Aeronautics
- Department of Correctional Services
- Department of Education
- Department of Health and Human Services
- Department of Labor
- Department of Natural Resources
- Department of Roads
- Game and Parks Commission
- Military Department
- Nebraska Brand Committee
- Nebraska Educational Telecommunications Commission
- Nebraska State College System
- Nebraska State Historical Society
- Office of the Capitol Commission

Intent

As stewards of historic buildings, state agencies or departments consult with the SHPO in the review of improvements, alterations, or changes to historic buildings to confirm that these modifications are in keeping with historical or architectural character. By adopting the federal Secretary of the Interior's "Standards for Rehabilitation," the universally accepted standards and guidelines for rehabilitation of historic buildings, the SHPO reviews proposed work to render an opinion regarding the appropriateness of a rehabilitation. The term "rehabilitation" assumes that some repair or alteration to historic buildings will be needed in order to provide for an efficient contemporary use. However, a project should not damage or destroy features that are important to defining the building's character.

---

3. No field survey work for the University of Nebraska system was conducted as part of this project. The University of Nebraska evaluated the statutes and offered the legal opinion that it is not considered a state agency and therefore is not subject to the law that had been established. (See Richard R. Wood, Memorandum to Council of Business Officers. October 30, 1987.)

Therefore, it is important to note that these standards are not intended to restrict modern uses or needs, but rather to encourage new uses and improvements while preserving historical and architectural character of state-owned historic buildings. The SHPO regularly consults with agencies and departments and recognizes the need for building improvements such as accommodations for people with disabilities, mechanical improvements, and plumbing and electrical upgrades. Modern uses which keep these buildings viable are facilitated by the "Standards for Rehabilitation" and SHPO review.

It is not the intention of the SHPO to review each and every small scale project, such as routine maintenance and repairs. A guideline for agencies or departments is to submit reviews for larger, capital improvement projects. These would include projects funded by the Nebraska Capital Construction Fund, special appropriations from the Legislature for major building projects, or projects funded by the Task Force for Building Renewal. Early consultation with the SHPO is encouraged so recommendations can be readily incorporated into preliminary plans and specifications. This will avoid project delays and the release of bids.

The Nebraska State Historical Society extends its thanks for the cooperation of these departments and agencies.

The Study

At the request of the Nebraska State Historical Society (NSHS), the Bahr Vermeer Haecker Architects project team, which also included Historic Resources Group, Inc., and Wiss, Janney, Elstner Associates, Inc., conducted a survey of state-owned buildings. The purpose of the survey was to document existing buildings and to assess each building in terms of its eligibility for nomination to the National Register of Historic Places in order to aid state agencies in compliance with Nebraska Revised Statutes 72-808–810 and 72-815.

In the fall of 2012, Administrative Services provided the inventory database of all state-owned buildings to the project team. The database includes 3,103 buildings. The Excel database was converted to a

Microsoft Access database, allowing the project team increased flexibility to manipulate the data provided. All buildings in the database constructed before 1968 were identified. These buildings were further vetted by property type with categorical exclusions exempting from the survey small scale utilitarian buildings such as Nebraska Department of Roads salt storage buildings and fuel record storage buildings, and the Nebraska Military Department's flammable storage buildings.

A total of 929 buildings were surveyed in the field, and 310 buildings were identified as significant historic buildings that are eligible for the National Register of Historic Places, currently listed in the National Register or currently designated National Historic Landmarks. The Nebraska Game and Parks Commission maintains more properties than any other state agency included in the survey with 413 buildings identified for field survey. The Nebraska Department of Roads maintains 170 buildings, and the Department of Health and Human Services follows with 122 buildings surveyed. The State College System maintains 73 buildings surveyed. The remaining agencies each maintain approximately 30 or fewer buildings.

Analysis of the data indicates that 529 of the 929 buildings included in the general survey were built after World War II and before 1968. However, the majority of significant buildings were constructed during the 1930s. Existing construction from this decade includes fifty-nine of the 310 significant historic buildings identified during the survey, with thirty-five of the significant buildings constructed in the 1940s and forty-eight in the 1950s. Depression Era construction efforts funded through the Works Project Administration (WPA) and the Civilian Conservation Corps (CCC) resulted in this spike in the numbers of significant buildings.

The decade of the 1950s retains the second highest concentration of historic buildings. The majority of these properties are maintained by the Nebraska Military Department and the Nebraska Department of Roads. Military Readiness Centers built after World War II and as a result of the Cold War era, as well as Department of Roads offices reflecting the expanding interstate system, encompass the pool of buildings constructed during this decade. The remainder of historic buildings are fairly evenly dispersed throughout the decades with the smallest number of buildings dating to the 1890s, and only eight significant buildings remaining from that period.

Twenty historic buildings constructed prior to 1880 and eighteen from the 1880s primarily represent early western expansion military forts. These include properties at Fort Robinson and Fort Hartsuff. Overall, among the surveyed buildings, the distribution of historic properties by decade clearly shows that a large proportion of significant buildings date to the 1930s.

Project Scope and Methodology

This survey builds on information gathered at the time the state statutes were adopted in 1987. At that time, a records search was conducted that identified construction dates of historic state-owned buildings, and photos of buildings were evaluated to generate a list of historic state-owned buildings subject to review under state statute (as further discussed below). No field survey work was conducted as part of development of this list. Also at that time, the University of Nebraska evaluated the statute and offered the legal opinion that it is not considered a state agency and therefore is not subject to the law that had been established.[4] The University system was therefore not included in the 1987 survey and also was not included in this survey effort.

This survey addressed all state-owned buildings determined to have been built before 1968, with the exception of University of Nebraska properties as noted above. Sixteen state agencies hold property and approximately ten have major holdings. The information regarding building ownership and construction date was provided through the Administrative Services building database. Records in this database are updated on an annual basis.

The survey will assist individual state agencies in identifying historic buildings under their management and aid agency cooperation under provisions of NRS 72-808 through 72-810. The survey consisted of identifying agency properties within the fifty-year threshold criteria of the National Register of Historic Places and thoroughly documenting individual properties with photographs, property descriptions, and relevant historical research, culminating in a determination of National Register eligibility for individual properties.

Research and Determination of Survey List. As this project was intended to identify historically significant state-owned buildings, the first step was to compile and verify a list of those buildings. To complete this step project personnel conducted research in the collections of the various state agencies in Lincoln, in order to filter and confirm the list of state-owned properties to be included in the survey. This process also correlated information in various collections into one comprehensive database.

Using the date of acquisition/construction information provided in the Fixed Assets Building and Land information/spreadsheet maintained by the Administrative Services/State Building Division (AS/SBD), the project team filtered the list of properties to be included in the survey. Given that the base list of buildings was created for purposes other than historic evaluation, certain inaccuracies and omissions existed and were identified for correction. For instance, properties constructed prior to 1900 had typically been assigned a construction date of 1900. The master list provided by SBD was filtered to extract all properties identified as being constructed prior to 1968. The 1968 date was employed so the survey project could foresee properties coming of age (50 years old) within the next five years extending the utility of this study by several years. The remaining list and database were reviewed by project personnel, the NSHS, and all associated state agencies to determine any adjustments to the list of properties to be included in the survey. As part of this process, the 1987 list of significant properties was reviewed to determine which properties listed are still extant and remain in state ownership; those properties were identified for re-survey. A field was included in the electronic database to indicate those

4. Richard R. Wood, Memorandum to Council of Business Officers. October 30, 1987.

buildings listed as significant in 1987. The preliminary survey list was further filtered to exclude certain utilitarian or unenclosed structures (e.g., prefabricated storage buildings, picnic shelters) from the survey.

In addition, AS/SBD files were reviewed to collect existing photographs. The project team contacted the relevant agencies for additional photographs of state-owned buildings. The photographs were correlated with the survey database.

Based upon this research, the survey database was updated with a confirmed list of properties to be included in the field survey. The updated list was provided to NSHS for review to confirm the scope of work for field survey and documentation. A total of 3,100 buildings were identified with construction dates of 1968 or prior. This list was further vetted based on a categorical exclusion exempting from the survey small scale utilitarian buildings such as Nebraska Department of Roads salt storage buildings and fuel record storage buildings, and the Nebraska Military Department's flammable storage buildings, as well as those with significant additions or alterations. A total of 934 buildings were identified for field survey. County, city, thematic, and other previous surveys in the collection of NSHS were reviewed to identify other previous documentation of state-owned properties. Relevant data from previous surveys was added to the preliminary survey database. Properties that have been surveyed within the past five years were re-surveyed using Google Streetview in coordination with previous documentation, where this documentation confirmed that significant changes have not occurred in the interim and that available information was sufficient to support the determination of eligibility.

Fieldwork. Fieldwork was conducted statewide during February, March, and April 2013 to document existing properties. Each property identified to be included in the survey was visited, and relevant survey data collected and photography completed on site. Access to properties was coordinated through NSHS and individual agencies as necessary. A map of Nebraska was utilized to graphically represent the distribution of various agency sites containing state-owned properties identified in the scope of investigation. This map was used to aid in the logistical planning for visiting individual sites. Refer to the foldout map at the end of this discussion.

Determination of Eligibility for Significant State-Owned Historic Buildings. Based on review of archival research materials and findings of the field work, a determination of eligibility to identify significant state-owned historic buildings was made for each property included in the survey. These determinations were made utilizing evaluation considerations outlined in the Nebraska State Historic Preservation Office's Nebraska Historic Resource Survey and Inventory Manual (2010). Generally, the survey manual follows the National Register of Historic Places (NRHP) Criteria for Evaluation, which identifies the following evaluation considerations:

- A property must be at least fifty years old. This survey includes an evaluation of all state-owned buildings constructed prior to 1968 in an effort to extend the longevity of conclusions recommended in this report.

- A property must retain its physical integrity, so that its present appearance closely resembles its original or historic appearance. Common alterations such as replacement roof materials, replacement windows, new additions, and siding materials are considerations in evaluating whether a property retains physical integrity.

- A property must be historically significant. Significance is evaluated using four basic criteria, which include a property's association with events or activities that have made a significant contribution to broad historical patterns; a property's association with the lives of people who are historically significant; a property's association with distinctive characteristics of a type of construction, architectural style, or significant architect; and its association with the potential to provide important information about prehistory or history. This last criterion is generally used in evaluating archeological sites, and was not utilized as part of this evaluation.

Existing NRHP nominations and National Historic Landmark (NHL) nominations were consulted as part of the evaluation methodology as well. Of the significant buildings identified, forty buildings are currently listed as part of NHL documentation and fifty-five buildings are currently listed in the NRHP. Other existing documents utilized as part of this study include the Aviation Development in Nebraska survey (2000) and the Historic Structures Reconnaissance Survey of Nebraska Army National Guard Readiness Centers, Field Maintenance System Sites, and Other Related Facilities (2010).

Additional consideration was given to groups of buildings that are historically related and may be considered eligible as a district. Examples of historic districts include state college campuses, medical facilities, parks, and correctional facilities. The evaluation of historic districts incorporates the significance of the group as a whole, as opposed to the individual significance of each building. It is possible for a building to be considered a contributing feature to the historic district, and not be considered an individually significant historic building. Small scale and support buildings are examples of those that may not be considered individually significant but which could contribute to historic districts. Also, impacts to a building's physical integrity are important considerations. Alterations and additions to a building may also affect the building's status as individually significant.

Survey and Inventory Data Entry. Following collection of information through research and field work, each property was entered electronically into a database for purposes of the Nebraska Historic Resource Survey and Inventory. The database was developed using Microsoft Access and includes a separate electronic record for each building. The electronic database contains all of the survey data as well as information provided by the state as part of the initial database of state-owned properties. The electronic database was used to generate the summary lists and survey forms included in this report.

Survey information includes the following:

- NeHRSI site number
- SBD inventory number(s)
- Name of building
- Common name(s)
- Associated building(s)
- Address
- City
- Construction date(s)
- Architect
- Other known people/companies associated
- Historic function (NRHP language)
- Number of stories

- Primary facade materials
- Roof orientation/form
- Roof materials
- Other architectural features
- Primary architectural style
- NRHP determination and rationale

Report. Upon completion of the survey, the project team prepared this report to document the results of research, field work, analysis, and National Register assessment. This report includes an introduction; a legislative summary of Nebraska state requirements for review of work or demolition involving historic buildings in state ownership; a description of the survey methodology and research background; results of the survey organized by agency with a summary history/introduction for that agency and a list of properties organized by site number, building name, and agency; and a bibliography.

The following state agencies and associated buildings are addressed in this study:

- Administrative Services/State Building Division
- Department of Aeronautics
- Department of Correctional Services
- Department of Education
- Department of Health and Human Services
- Department of Labor
- Department of Natural Resources
- Department of Roads
- Game and Parks Commission
- Military Department
- Nebraska Brand Committee
- Nebraska Educational Telecommunications Commission
- Nebraska State College System
- Nebraska State Historical Society
- Office of the Capitol Commission

Administrative Services

Agency History

According to State Statute 81-101, adopted in 1965, the *Nebraska Administrative Services Annual Report* (2012) and the *Nebraska Blue Book* (2012–2013), Administrative Services was one of twelve departments created for the purpose of aiding the Governor in the execution and administration of the law. The department is responsible for coordinating and administering the state's accounting, budget, construction, and supply requirements.

The Administrative Service website states that the department is currently composed of twelve separate divisions and one Commission including the Accounting Division, Budget Division, Materiel Division, Building Division, Division of Communications, Risk Management Division, Division of Employee Relations, Information Management Services, Office of the Chief Information Officer, Task Force for Building Renewal, Transportation Services Bureau, Personnel Division, and Office of the Capitol Commission.[5]

The Accounting and Budget divisions were part of the original formation of Administrative Services. The Materiel Division was established in 1969 as the state purchasing agent and is responsible for inventory control.

In 1974, the Building Division was created to plan, construct, and administer state facilities. The Division has oversight of all state-owned real estate and works closely with the Nebraska Capitol Commission, State Comprehensive Capital Facilities Planning Committee, Vacant Building and Excess Land Committee, and the Task Force for Building Renewal to manage built resources. The Division of Communications (also known as the Central Services) was established in 1975, expanding the scope and authority of the previously established Telecommunications Bureau. In 1981, the Risk Management Division was created to oversee the newly formed Risk Management Program and the State Claims Board, which had been established in 1969.

The Division of Employee Relations, formerly a part of the Department of Personnel merged into Administrative Services in 1992. The Division is responsible for negotiating labor contracts and coordinating grievance procedures. Information Management Services was initially a separate agency known as Central Data Processing, and was made a part of Administrative Services in 1998. This division supplies state and local government entities with computer information services, education, and training, as well as online network services and staff consulting.

The Office of the Chief Information Officer was created in 1998, and works with the Nebraska Information Technology Commission to ensure cost-effective and efficient use of state resources and investments in information technology. In 2004, the Nebraska legislature created the Office of the

5. Administrative Services website, viewed July 2, 2013. http://das.nebraska.gov/divisions/divisions.html

Capitol Commission and transferred management and preservation of the Nebraska State Capitol to the agency.

Survey Summary

Spanning from the 1910s through the 1960s, the buildings held by Administrative Services represent a variety of ages and designs. The diversity of the group of buildings utilized by Administrative Services reflects the diverse role it plays in the government. A total of twenty-four Administrative Services properties were surveyed as part of this project. Of those surveyed, ten buildings were identified as historically significant, with five of those buildings already listed in the National Register of Historic Places.

Department of Aeronautics

Agency History

The Nebraska Department of Aeronautics was established in 1945 through the State Aeronautics Act (L.B. 282) and was based on the work of the Nebraska Aeronautics Commission. The Nebraska Aeronautics Commission was created through state legislation enacted in 1935 to regulate civilian aviation personnel and flight training schools, set standards for the construction and development of privately and publicly owned airports, and set up state-wide air marking systems to guide pilots from the air.

The department was responsible for the acquisition and development of the state's first airports. They designed and constructed simple administration buildings and metal hangers and worked closely with the Department of Roads and Irrigation to construct runways. [6]

Today, the department works with federal and state organizations, including the Federal Aviation Administration to manage the numerous national, regional, local, and private airports throughout the state.

Survey Summary

A total of twenty-two buildings held by the Department of Aeronautics were surveyed in this project, with five identified as being historically significant. These five buildings represent two airfields, Fairmont State Airfield and Harvard State Airfield, both of which are significant for their association with Nebraska's role in WWII. The Fairmont State Airfield, historically known as the Fairmont Army Airfield, was listed in the National Register in 2003 and includes four of these significant buildings.

Department of Correctional Services

Agency History

The beginning of today's Nebraska Department of Corrections can be traced back to 1901, when the Nebraska State Penitentiary along with other public institutions, such as the Nebraska School for the Deaf, came under the supervision of the State Board of Charities and Corrections. On July 1, 1913, a state constitutional amendment transferred management and control of all public institutions to the Board of Commissioners of State Institutions. Six years later, the Department of Public Welfare was formed to supervise operations at public institutions. The Nebraska Board of Control, a division of this department, assumed jurisdiction over state penitentiaries.[7]

In 1962, oversight of the state's corrections system and mental health facilities were transferred to the newly formed Department of Public Institutions. In 1973, a separate Nebraska Department of Correctional Services was established. Under the direction of Victor G. Walker, the new department supervised the state penal system, Reformatory for Women, youth development centers, and State Parole Administration.

Legislation passed in 1979 provided funding for improvements to penal facilities throughout the state. As a part of infrastructure improvements, old penal institutions were replaced with new correctional centers in Omaha and Lincoln.

In 1997, the Office of Juvenile Services, a division of the Department of Correctional Services, was transferred to the newly-formed Health and Human Services System.[8] In 2007, the Health and Human Services System was renamed the Department of Health and Human Services.[9]

Survey Summary

Changing philosophies and demands upon the state's corrections system are reflected in the buildings utilized by the Department of Corrections. A total of thirty-one buildings were surveyed as part of this project. Of those surveyed, thirteen buildings were identified as being historically significant for their association with the development and architecture of correctional services. None of these buildings is currently listed in the National Register.

Department of Education

Agency History

Nebraska Center for the Education of Children who are Blind or Visually Impaired (NCECBVI), a division of the Department of Education, was founded in 1875 in Nebraska City as an institution dedicated to educating the blind.[10] In 1869, the State of Nebraska established its first institutions, the State Penitentiary and the School for the Deaf. For many years these institutions operated independently. They were later placed under the supervision of the Nebraska Conference of Charities and Corrections, and then under the supervision of the Board of Public Lands and Buildings.

On November 5, 1912, a constitutional amendment placed the management and control of these institutions under the Board of Commissioners of State Institutions, effective July 1, 1913. By Constitutional Amendment of September 21, 1920, the name of this board was changed to the Board of Control. On January 1, 1962, the name was changed again, to the Department of Public Institutions. The Board of Control also served as the Board of Public Welfare. Therefore, both institutions and welfare operations were supervised by the same body until January 1962, when the Department of Public Institutions and the Department of Public Welfare became separate entities.

In 1952, Nebraska voters approved a constitutional amendment proposed by the Legislature (Nebraska Constitution, Article VII, Section 2; and 79-30) to establish the State Department of Education under the authority of the State Board of Education. A new state educational structure initiated in 1955 transferred the powers and duties held by the State Superintendent of Public Instruction to the State Board of Education, the State Department of Education, or the Commissioner of Education. In 1960, the NCECBVI was transferred to the Department of Education.

Survey Summary

The Department of Education holds four buildings that were surveyed in this project. The buildings represent a range of construction dates, from pre-1900 to post-1960. Upon evaluation, only one building surveyed was deemed historically significant and eligible for the National Register of Historic Places for its association with the development of early education in Nebraska, the 1875 Old Gym Building at the Nebraska Center for the Education of Children who are Blind or Visually Impaired in Nebraska City. This building is not currently listed in the National Register.

Department of Health and Human Services

Agency History

As described in the *Nebraska Blue Book* (2012–2013), the Health and Human Services Act (LB296) was passed by the Nebraska State Legislature in March 2007.[11] The Act transferred the administration of publicly funded health and human services programs within the State of Nebraska from the Health and Human Services System to the newly created Department of Health and Human Services, effective July 1, 2007, and eliminated the Health and Human Services System and its three departments.

The Health and Human Services Act was part of a reorganization of state departments established in 1996 by the Nebraska Partnership for Health and Human Services Act (LB1044). The Partnership eliminated the Aging, Health, Public Institutions, and Social Services departments and the Office of Juvenile Services in the Department of Correctional Services, and created a system of three agencies beginning on January 1, 1997. The new agencies were the Department of Health and Human Services, the Department of Health and Human Services Regulation and Licensure, and the Department of Health and Human Services Finance and Support.

The system of new agencies was directed by a Policy Cabinet made up of the three agency directors, a policy secretary, and a chief medical officer (if one was appointed). Under the Health and Human Services Act, a Chief Executive Officer of the Department of Health and Human Services is appointed by the Governor and confirmed by the Legislature; this appointee directs the Department of Health and Human Services. The Department has six divisions, whose directors are also appointed by the Governor and confirmed by the Legislature; these divisions include Behavioral Health, Children and Family Services, Developmental Disabilities, Medicaid and Long-Term Care, Public Health, and Veterans' Homes.

Survey Summary

Changing philosophies and demands upon the state's health and human services system are reflected in the buildings utilized by the Department. A total of 122 buildings were surveyed as part of this project. Of those surveyed, forty-nine buildings were identified as being historically significant and eligible for the National Register of Historic Places for their association with the development and architecture of health facilities across the state. Currently, none of these buildings are listed in the National Register.

Department of Labor

Agency History

According to the 2000–2001 edition of the Nebraska Blue Book, the 1887 Legislature created the Bureau of Labor, Census and Industrial Statistics.[12] The Governor was named commissioner of labor, with office duties performed by a deputy commissioner and other employees. The 1917 Legislature created the office of deputy compensation commissioner, and in 1919 the office's duties were assigned to the secretary of labor. In 1933, the title of the chief deputy was changed to commissioner. In 1935, the Legislature set up the Workmen's Compensation Court and transferred workmen's compensation laws to this court.

The department is currently organized into the Office of Workforce Services, the Office of Unemployment Insurance, the Office of Safety and Labor Standards, the Office of Legal Counsel and Legislative Affairs, the Office of Information Services, and the Office of Finance and Human Relations.

Survey Summary

The Department of Labor retains two office buildings that were included in the survey, both of which are located at the capitol complex in Lincoln. Both buildings were included in this survey and are considered historically significant and eligible for the National Register of Historic Places. Neither is currently listed in the National Register.

Department of Natural Resources

Agency History

As described in the *Nebraska Blue Book* (2012–2013), the Department of Natural Resources was created on July 1, 2000, merging the Department of Water Resources and the Natural Resources Commission (LB900).[13]

The Department of Water Resources had its origins in the State Board of Irrigation, which was created by the State Legislature in 1895 and given jurisdiction over water rights for irrigation, power, and other purposes. In 1911, the name of the board was changed to the State Board of Irrigation, Highways and Drainage, and its director, the state engineer, was given responsibility in other fields. In 1919, the board was renamed the Department of Public Works. Within the department, the Bureau of Irrigation, Water Power, and Drainage was formed. In 1933, the department was renamed the Department of Roads and Irrigation, and was given jurisdiction over highways, vehicle registration, and law enforcement, as well as water rights issues.

In 1957, the State Legislature created the Department of Water Resources. This department was given the powers and duties formerly exercised by the Bureau of Irrigation, Water Power, and Drainage as part of the Department of Roads and Irrigation, and carried out the work begun by the State Board of Irrigation.

The Natural Resources Commission was originally established in 1937 as the State Soil Conservation Committee. It was later known as the Soil and Water Conservation Commission and in 1972 was renamed the Nebraska Natural Resources Commission.

The Department of Natural Resources carries out the functions and programs of the merged Department of Water Resources and Natural Resources Commission. Responsibilities of the department include regulating the use and storage of surface water from Nebraska's streams, lakes, and reservoirs, and authorizing the transfer of groundwater by industrial and municipal groundwater users. The department also measures and records state stream flows, maintains the state water wells registration system, and approves requests to waive state water well spacing requirements. The department issues permits to allow the development of geothermal groundwater use and to allow groundwater transfers to another state.

In addition, the department administers Nebraska's Flood Plain Regulation Act and provides state coordination of the National Flood Insurance Program, which includes coordination of floodway boundaries and assisting local governments and subdivisions in meeting requirements prescribed by the Federal Emergency Management Agency, which administers the flood insurance program. The

13. Historical overview summarized from the *Nebraska Blue Book*, 2012–2013.

department is also reviews and approves plans and specifications for dams with respect to safety and regularly inspects dams for safety violations.

In response to the Nebraska Groundwater Management and Protection Act, the department reviews the state's water supplies annually to determine if any basins are fully appropriated. In areas of the state where basins are fully appropriated (or over-appropriated), the department works with natural resources districts to create integrated management plans to sustain water uses and supplies.

The department is also responsible for coordinating state efforts to comply with interstate stream compacts. The department director is the Nebraska member of several interstate bodies responsible for administering stream and border compacts.

Survey Summary

One building owned by the Department of Natural Resources was included in this survey. It was built in the 1930s and is considered historically significant and eligible for listing in the National Register of Historic Places. It is not currently listed in the National Register.

Department of Roads

Agency History

According to the *Nebraska Blue Book* (2012–2013), the Department of Roads is the state agency responsible for highway, bridge, rail, public transit, and other surface transportation programs, with responsibility for planning, design, construction, maintenance, operations, and federal program administration.

In 1895, the State Legislature established the State Board of Irrigation, renamed the State Board of Irrigation, Highways and Drainage in 1911. In 1919, the board was again renamed and became the Department of Public Works; this board included the Bureau of Roads and Bridges, the Bureau of Irrigation, Water Power, and Drainage, and the Motor Vehicle Records Division.

In 1933, the Department of Public Works was renamed the Department of Roads and Irrigation through state legislation. Four years later, the Division of Highway Safety and Patrol was established through state legislation as part of the Department of Road and Irrigation.

In 1957, the Department of Roads and Irrigation was divided into three separate state entities: the Department of Roads, Department of Motor Vehicles, and Department of Water Resources. The Department of Roads included the Bureau of Highways and the Nebraska Safety Patrol, renamed the Nebraska State Patrol in 1967. In 1981, the Nebraska State Patrol became a separate state agency.[14]

Survey Summary

One hundred seventy buildings held by the Nebraska Department of Roads were included in this survey. Sixteen buildings are considered historically significant and eligible for listing in the National Register of Historic Places. The department maintains many buildings constructed prior to 1968 that were not included in this survey. These buildings were evaluated in consultation with the NSHS and included primarily salt storage sheds along secondary highways. The vast majority of National-Register eligible Department of Roads buildings were built during the decades of the 1950s and 1960s and most likely reflect the rapid growth of the interstate and statewide highway systems.

Game and Parks Commission

Agency History

According to the *Nebraska Blue Book (*2012–2013), the Game and Parks Commission is responsible for managing state parks, wildlife, fish, wildlife lands, boating, and all resource and activities related to these areas. The Commission is funded through permit sales, state general fund allocations, and federal funds. The Commission has six regional district offices at Alliance, Bassett, Kearney, Norfolk, North Platte, and Lincoln, as well as a Metro Information Office in Omaha.[15]

The first wildlife conservation agency in the State of Nebraska can be traced back to 1879, with the creation of the Board of Fish Commissioners. The board was created to increase fish populations and their distribution within Nebraska's public waters. In 1901, an Act passed by the state legislature led to the disbandment of the Board of Fish Commissioners and the subsequent formation of the Nebraska Game and Fish Commission, a precursor to the Game and Parks Commission. The Act also called for restriction on fishing and game hunting and provided funding for employees to enforce laws and restrictions.

In 1919, the board was transferred to the newly-formed Department of Agriculture to improve enforcement and funding of conservation laws and programs. Two years later, the board was renamed the Bureau of Game and Fish. Also in 1921, the State Park Board, a division of the Department of Public Works, was established to manage the state's four parks.

In 1929, the Bureau of Game and Fish and the State Park Board were replaced with the Game, Forestation, and Parks Commission. The Commission consisted of five board members appointed by the governor.

The Commission was reorganized in 1954, from a central state office and board to five regional districts, each charged with managing the resources within its boundaries. State legislation passed in 1967 created the post of State Forester for the University of Nebraska. This legislation transferred responsibility for forests from the Commission; the name was later changed to the Game and Parks Commission.[16]

Survey Summary

The Commission retains the highest number of historic buildings surveyed. Four hundred thirteen buildings were included in this survey across the state, with 127 building identified as significant historic properties either eligible for listing in or already listed in the National Register of Historic Places. The majority of significant buildings were constructed prior to 1910 and primarily include military forts such

16. Farrar, Jon. *100 Years of Game and Parks History.* Viewed online at http://outdoornebraska.ne.gov/nebland/articles/history/commission.asp.

as Fort Robinson and Fort Hartsuff. The second period of highest concentration of historic buildings constructed is the 1930s, with thirty-four of the eligible buildings constructed during that decade. This is due to the influx of Depression Era public works projects.

Military Department

Agency History

According to the *Nebraska Blue Book (*2012–2013), on February 15, 1864, the State Legislature established the adjutant general's office for the Nebraska Territory. The territorial militia was organized under an act approved in the following year. However, the initial organization of two regiments took place earlier, in 1854. The militia was first organized in reaction to the Great Sioux and Cheyenne Indian War on the territorial border. The nature of the early militia changed to meet the state's needs from 1854 until the end of the Indian Wars in 1890. By 1881, after having been part of the Secretary of State's office for the past ten years, the office of adjutant general was again established as a separate entity. The office has continued in this capacity since that time.[17]

Legislation passed in 1974 formally changed the office's name to the Military Department. In addition to commanding the state military forces, the adjutant general is state emergency management director, emergency resource management coordinator, emergency preparedness director, and state disaster coordinator.

The governor, as state military force commander in chief, appoints the adjutant general from commissioned officers of the Nebraska National Guard. The adjutant general serves until reaching the mandatory retirement age of 64. The adjutant general controls Military Department forces for the governor and transmits the governor's orders. The adjutant general also represents the state at national, regional, and area military and nonmilitary defense conferences. The adjutant general develops all civil and military defense, state emergency preparedness, and disaster recovery plans for the state. He coordinates with appropriate national and regional agencies and other states to formulate Army, Air Force, civil defense, and emergency plans for the state.

Survey Summary

The Military Department holds twenty-six buildings that were included in this survey, nineteen of which are recommended as historically significant and eligible for listing in the National Register of Historic Places. These buildings were all previously surveyed by URS Corporation in 2010 and identified as eligible at that time. They consist entirely of Readiness Center buildings constructed during the 1950s and 1960s reflecting the influx of military spending after World War II and during the Cold War era. Currently, none of these buildings is listed in the National Register.

17. Historical overview summarized from the *Nebraska Blue Book*, 2012–2013.

Nebraska Brand Committee

Agency History

According to the *Nebraska Blue Book* (2012–2013), the Nebraska Brand Committee was created through state legislation passed in 1941 to protect Nebraska brand and livestock owners from theft. The committee records all new brands, brand transfers and brand renewals, and maintains a recorded brand book. The committee's hired investigative staff, reports thefts or missing livestock and identifies the owners of strays or cattle with an unknown owner. The Nebraska Brand Committee is composed of five members appointed by the governor to four-year terms. [18]

Survey Summary

One building utilized by the Nebraska Brand Committee was surveyed, the administrative office building in Alliance. This building is not considered to be significant or eligible for listing in the National Register of Historic Places.

18. Historical overview summarized from the *Nebraska Blue Book*, 2012–2013.

Nebraska Educational Telecommunications Commission

Agency History

According to the online history of the Nebraska Educational Telecommunications Commission (NET), the commission today is the result of fifty years of development and "serves as testament to the vision of the people of Nebraska who made it possible."[19]

In 1951, the Board of Regents of the University of Nebraska petitioned the Federal Communications Commission (FCC) to reserve UHF channel 18 for noncommercial educational use in Lincoln. In 1954, Cornhusker Radio and Television Corporation, a subsidiary of Fetzer Broadcasting Company, acquired licenses to operate channels 10 and 12 in Lincoln. The channel 12 license was offered to the University with a trust established pending FCC approval, and the educational television channel allocation for Lincoln was changed from UHF channel 18 to VHF channel 12. KUON-TV Channel 12 began operating November 1, using studios and equipment of KOLN-TV Channel 10, Lincoln. The station was on the air mornings only, Monday through Saturday.

In 1956, the Board of Regents of the University of Nebraska assumed control of the KUON-TV Channel 12 license, and in the following year the channel began operating from a renovated space in the University's Temple Building at 12th and R Streets in Lincoln. In 1961, five VHF channels and three UHF channels were allocated by the FCC to the Nebraska Council for Educational Television, Inc.

In 1963, the state legislature enacted two bills implementing the recommendations of a statewide survey. The Nebraska Educational Television Act created the Nebraska Educational Television Commission, with responsibility to develop and administer a statewide network, and a second bill appropriated $600,000 to construct the first phase of the network, with additional funding provided through the federal Educational Television Facilities Act.

The Nebraska Educational Television Council for Higher Education (NETCHE) was incorporated in May 1966 as the nation's first statewide all-inclusive collegiate educational television organization. An initial federal grant of $145,000 was awarded to NETCHE, Inc., to acquire television equipment for member colleges, with federal grants later awarded through 1973 for the development of college-level instructional programs.

Beginning with the 1969–1970 season, network stations began offering broadcast service seven days a week. Also in 1970, the Nebraska Legislature passed measures authorizing construction of a telecommunications building. Land at 1800 North 33rd Street in Lincoln was deeded from the University

19. *NET History*. Viewed online at http://www.netnebraska.org/basic-page/about-net/net-history.

of Nebraska-Lincoln to the City of Lincoln for construction of the Nebraska Educational Telecommunications Center. The center was dedicated on June 4, 1972.

In 1973, the FCC approved the Nebraska ETV Commission's application to remotely control KXNE-TV Channel 19, Norfolk; KYNE-TV Channel 26, Omaha; and KHNE-TV Channel 29, Hastings. On October 1, KYNE-TV Channel 26 began broadcasting selected programs from the University of Nebraska at Omaha campus.

In 1975, the first statewide legislative hearing to be broadcast live on Nebraska television was held February 25 in the Network studios, featuring the Nebraska Legislature's Judiciary Committee deliberations on correctional reforms. In the same year, the Commission received a $25,000 grant from the Corporation for Public Broadcasting (CPB) to study the feasibility of a statewide public radio service in Nebraska; development of a statewide network was recommended by the Commission on August 18.

In 1984, revised legislation resulted in renaming of the Nebraska Educational Television Commission to the Nebraska Educational Telecommunications (NET) Commission, and expanded its responsibilities to include telecommunication technologies. In 1986, the state legislature directed the NET Commission to establish and operate a statewide public and educational radio service, but provided no funding.

In 1990, public radio stations across the state were activated. The entire Nebraska Public Radio Network (NPRN) was dedicated on October 8, with a concert program by the Lincoln Symphony Orchestra broadcast by NPRN and simulcast on Nebraska ETV.

In 2001, the Nebraska Public Radio Network (NPRN) expanded its schedule to 24-hour broadcasting, launched its new website and changed the KUCV frequency from 90.9 FM to 91.1 FM.

In 2005, NET completed a $15 million building renovation. .

Survey Summary

A total of eleven buildings utilized by the Nebraska Educational Telecommunications Commission were surveyed. Of these, nine buildings consist of broadcast stations. The Carpenter and McBride Nebraska Educational Telecommunications Center in Lancaster and the SERC Building in Omaha were also included in the survey. None of these buildings was determined significant or eligible for listing in the National Register of Historic Places.

Nebraska State College System

Agency History

According to the Nebraska Blue Book 2012–2013, the Nebraska State College System consists of Chadron, Peru, and Wayne State Colleges, and is governed by a Board of Trustees. The board was created in 1867, and in 1921 legislation was amended to incorporate a seven-member board called the Board of Education of State Normal Schools. This board managed and oversaw the operations of the state normal schools. The 1936 state legislature renamed the normal schools as state schools, although the board's name was not changed until 1969, when it became the Board of Trustees of the Nebraska State Colleges. In the same year the board was organized as a public corporation, thereby vesting it with the power to issue bonds to fund capital construction on campuses such as dormitories and student service buildings. The board today has active professional members as well as student members, all of whom are appointed by the governor.[20]

Peru State College was founded in 1867.[21] It was Nebraska's first college and the third teacher education facility located west of the Missouri River. Colonel T. J. Majors, a Civil War veteran, led the way for the school to become a state university; although his attempts were not successful, the legislature did accept the school as a normal school and for thirty-eight years Peru State was the only institution in the state to educate teachers. In 1963 the school's name was changed to Peru State College, and today the school is a regionally accredited state college offering four-year degrees.

Wayne State College was established in 1910 as a state normal school for the education of teachers, upon the state's purchase of a private school called the Nebraska Normal College, which had been established in 1891.[22] The school evolved from the State Normal College to the State Normal School and Teacher's College, and by 1949 was known as the Nebraska State Teachers college at Wayne. Its present name was adopted in 1963.

Chadron State College was founded in 1909, opened in 1911, and also began as a state normal school.[23] Chadron State is the only four-year-degree granting school in western Nebraska. The college quickly grew and established its campus core by the late 1920s. Chadron State is the only college campus in Nebraska with a listed National Register historic district.

20. Historical overview summarized from the *Nebraska Blue Book*, 2012–2013.

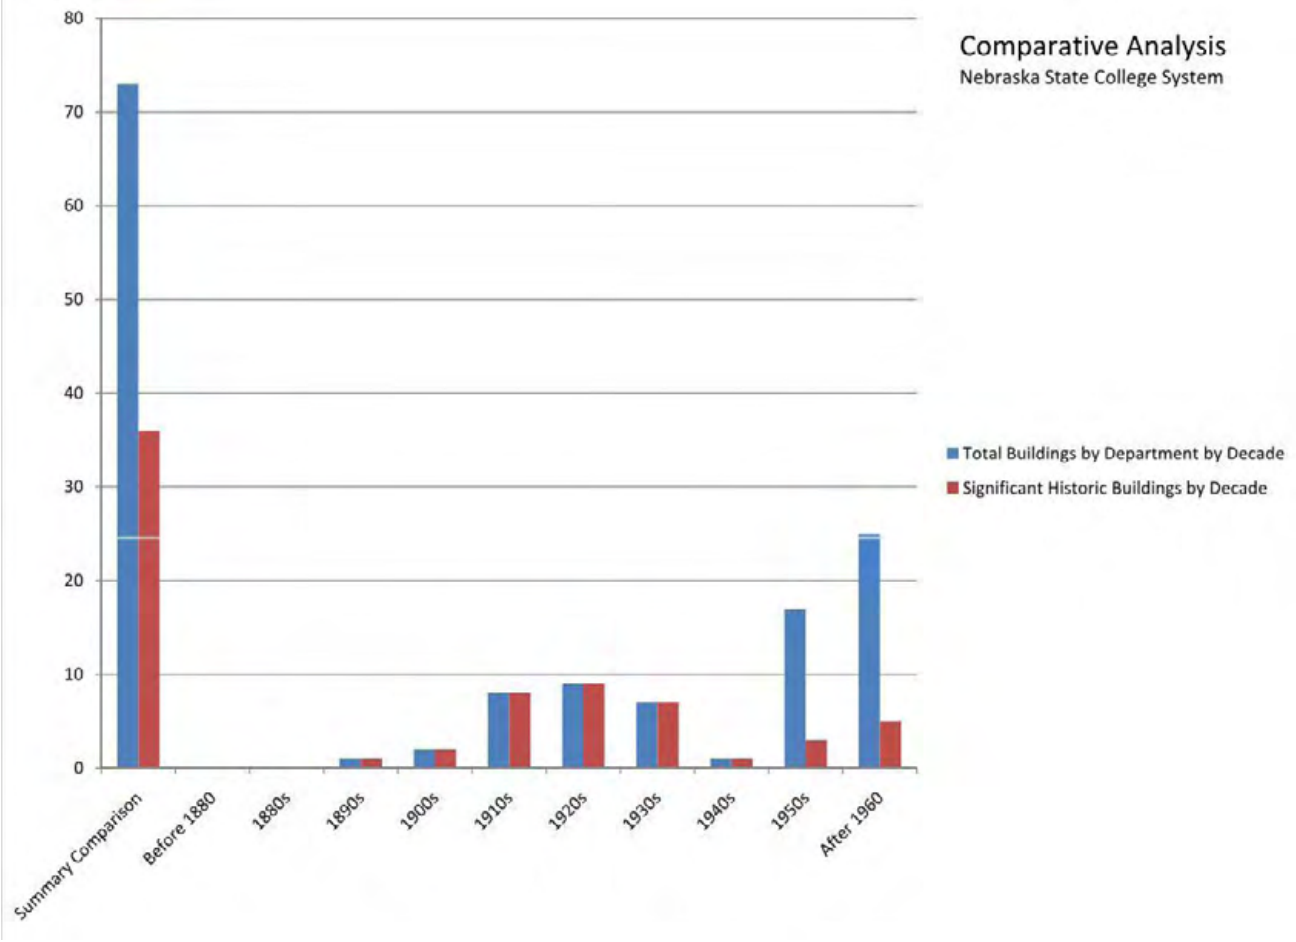
Survey Summary

Seventy-three buildings maintained by the State College System were included in this survey. Thirty-six buildings were identified as significant historic buildings, with six buildings currently listed in the National Register of Historic Places.



ID	Name	Constructed Date

Nebraska State College System

Chadron State College

50C0014200B	HILDRETH HALL	7/1/1926
	Five Buildings at the Chadron State College campus were listed in the NRHP in 1983. Although Hildreth Hall is not part of the NR nomination, it is eligible under criterion A for its contribution to state college system educational development.	
50C0014400B	OLD ADMINISTRATION BUILDING	7/1/1911
	Eligible under criterion A for its contribution to the development of the state college system in Nebraska at Chadron State College campus.	
50C0014600B	HEATING PLANT	7/1/1912
	additions, 1967, 1990, 2003	
50C0014700B	MEMORIAL HALL	7/1/1953
	Memorial Hall is eligible under criterion A for its contribution to the development Chadron State College historic district.	
50C0015200B	RETA E. KING LIBRARY	7/1/1966
	The library is eligible under criterion A for its contribution to educational development at the Chadron State College Campus.	
50C0015300B	MILLER HALL	7/1/1920
	Miller Hall is currently listed as a contributing resource in the Chadron State College Historic District National Register nomination	
50C0015400B	MARI SANDOZ HIGH PLAINS HERITAGE CENTER	7/1/1929
	The Mari Sandoz High Plains Heritage Center is listed as a contributing resource to the Chadron State College Historic District nomination	
50C0038601B	ELLIOT FIELD/BEEBE STADIUM	1/1/1929
	Elliot Field and Beebe Stadium contribute under criterion A to the development at Chadron State College Historic District.	
50C0131200B	SPARKS HALL	7/1/1914
	Sparks Hall is listed in the National Register as a contributing resource to the Chadron State College Historic District	
50C0131400B	EDNA G. WORK HALL	7/1/1932
	This building is currently listed in the National Register as a contributing resource to the Chadron State College Historic District	
50C0132000B	CRITES HALL	7/1/1938
	Crites Hall is listed as a contributing resource to the Chadron State College Historic District	

Peru State College

50P0006000B	ADMINISTRATION BUILDING	7/1/1911
	Eligible under criterion A for its contribution to the state college system at Peru campus.	
50P0006100B	AUDITORIUM/THEATRE	7/1/1922
	Eligible under criterion A for its contribution to the development of the state college system at Peru.	
50P0006300B	W.N. DELZELL HALL	7/1/1939
	Eligible under criterion A for its contribution to the development of the state college system at Peru, as well as criterion C for its architectural merit.	

ID	Name	Constructed Date
50P0006400B	T. J. MAJORS HALL	7/1/1916
	Eligible under criterion A for its contribution to the Nebraska state college system at Peru.	
50P0007000B	LIBRARY (FORMER OLD GYMNASIUM)	7/1/1915
	Eligible under criterion A for its contribution to Nebraska state college system at Peru as well as criteroin C for its architectural merit.	
50P0007100B	CAMPUS SERVICES	7/1/1907
	Eligible under criterion A for its contribution to the development of the state college system at Peru.	
50P0007400B	W.F. HOYT SCIENCE BUILDING	7/1/1930
	Eligible under criterion A for its contribution to the development of the state college system at Peru.	
50P0007600B	CENTER FOR ACHIEVEMENT & TRANSITION SERVICES (CATS)	7/1/1905
	Eligible under criterion A for its contribution to the development of the state college system at Peru.	
50P0007800B	ELIZA MORGAN HALL	7/1/1929
	Eligible under criterion A for its contribution to the development of the state college system at Peru.	
50P0007900B	NEAL HALL	7/1/1967
	Eligible under criterion A for its contribution to the development of the state college system at Peru.	
50P0008000B	PRESIDENT'S HOUSE	7/1/1892
	Eligible under criterion A for its contribution to the development of the state college system at Peru as well as criterion C for its architectural merit.	
Wayne State College		
50W0128600B	CONNELL HALL	7/1/1923
	Eligible under criterion A for its contribution the development of the state college system at Wayne, as well as criterion C for its architectural merit.	
50W0128701B	EDUCATION BLDG	7/1/1915
	Eligible under criterion A for its contribution to the development of the state college system at Wayne as well as criteron C for its architectural merit.	
50W0128800B	PETERSON FINE ARTS CENTER	7/1/1967
	Eligible under criterion A for its contribution to the state college system at Wayne.	
50W0128900B	HAHN ADMINISTRATION	7/1/1926
	Eligible under criterion A for its contribution to the development of the state college system at Wayne, as well as criterion C for its architectural merit.	
50W0129000B	HUMANITIES BUILDING	7/1/1912
	Eligible under criterion A for its contribution to the development of the state college system at Wayne, as well as criterion C for its architectural merit.	
50W0129300B	STUDIO ARTS (POWER HOUSE)	7/1/1929
	Eligible under criterion A for its contribution to the development of the state college system in Nebraska.	
50W0129900B	STADIUM ENCLOSURE (O)	7/1/1949
	Eligible under criterion A for its contribution to the development of the state college system in Wayne, as well as criterion C for its architectural merit.	
50W0169500B	ANDERSON HALL	7/1/1957
	Eligible under criterion A for its contribution to the development of the state college system at Wayne.	

State-Owned Buildings Survey, 2013

ID	Name	Constructed Date
50W0169600B	BERRY HALL	7/1/1960

Nebraska State Historical Society

Agency History

According to the Nebraska Blue Book (2012–2013), the Nebraska State Historical Society (NSHS) was founded in 1878 and by 1883 was formally codified as a state institution, but did not become a state agency until 1994.[24] The NSHS website documents the growth of the agency in five phases, identified as emergence, growth, outreach, modernization and expansion, and reorganization and focus. Throughout the years of its existence the NSHS saw periods of emergence, growth, outreach, modernization and expansion, and reorganization and focus. The period of emergence established the NSHS from a group of organized citizens who recognized the importance of their time and consciously built the foundation for a public institution, cemented by its convergence to a state institution in 1883.[25]

During the early twentieth century, the NSHS increased its collections and documentation efforts. This was a period of intense archeological field excavation, documentation of historic sites and buildings, and active archival collecting. Throughout this period of growth, the NSHS supported traveling lectures, placement of historical markers, and establishment of a permanent museum and state archives. The NSHS opened a bigger museum in the Nebraska State Capitol building, began its quarterly journal, and was responsible for preserving the public records of the state. The archives hold significant state records, archival images, and volumes of Nebraska history documented through publications and newspapers.

After World War II, the Society identified the need for and built a new headquarters building at 1500 R Street in Lincoln. New departments were established including historic preservation and education, as well as a highway archeology salvage program. A new location for the museum was acquired and museums were established at six historic properties across the state.

The NSHS continues to refine its focus, build its technological capabilities through computerization and technology, and plan for growth in the twenty-first century.

Survey Summary

Twenty-eight buildings maintained by NSHS were included in this survey and all twenty-eight are considered significant historic properties. All of the NSHS buildings are either listed in the National Register of Historic Places or have been designated National Historic Landmarks.

Office of the Capitol Commission

Agency History

As described in the *Nebraska Blue Book* (2012–2013), the Nebraska Capitol Commission advises and votes on recommendations from the Office of the Capitol Commission regarding the following: policies and guidelines for the proper conservation, restoration, enhancement and interpretation of the State Capitol and its furnishings and grounds policies and guidelines for the use of the Capitol's preservation and adaptive-use spaces, including adoption of a document of standards facilities planning, construction, administration and documentation maintenance of the State Capitol and grounds participation with the Capitol Environs Commission on related projects.[26] The 1949 Legislature changed the original Capitol Commission to the State Building Commission. The Building Commission membership was altered by the 1965 Legislature and again in 1974 when the Legislature designated the body as advisory. The 1993 Legislature changed the name back to the Capitol Commission and altered the membership to include representation from the legislative and judicial branches. The governor chairs the commission. Other ex officio members include the speaker of the Legislature, the Chief Justice of the Nebraska Supreme Court, the dean of the College of Architecture at the University of Nebraska-Lincoln and the director of the Nebraska State Historical Society.

Survey Summary

The Capitol Commission maintains the Nebraska State Capitol, a National Historic Landmark. This is the only building overseen by the Capitol Commission.

26. Historical overview summarized from the *Nebraska Blue Book*, 2012–2013.

Appendices

Appendix A: Legislation

Appendix B: List of All Buildings Included in Survey

Appendix A: Legislation

72-808. Historic structure; legislative findings.

The Legislature finds that:

(1) The preservation of historic structures will enrich life for Nebraska's citizens both today and for future generations;

(2) Many historic structures are owned by the state; and

(3) Efforts should be made by the state to identify, preserve, maintain, and restore such historic structures whenever possible.

72-809. Historic structure; defined.

For purposes of sections 72-808 to 72-810, historic structure shall mean any building significant in American history or architecture on a local, state, or national level.

72-810. Historic structure; alterations; requirements.

Improvements, alterations, or changes made by the state, its agencies, or departments on or to any historic structure owned by the State of Nebraska shall be in keeping with its historical or architectural significance. Such alterations shall be made according to standards set by the United States Department of the Interior. No alteration shall be made without review and comment by the State Historic Preservation Officer. If the state, its agencies, or departments do not agree with the review and comment of the officer, a final determination as to what action must be followed by the state shall be made by the Governor. A state agency or department shall only be required to comply with this section if it has been notified in writing by the officer that a particular structure is a historic structure.

72-815. Vacant buildings and excess land; state building division; powers and duties; demolition; sale; lease; proceeds; disposition; maintenance; excess land at Hastings Regional Center; sale; distribution of proceeds.

(1) The state building division of the Department of Administrative Services shall be responsible for the sale, lease, or other disposal of a building or land, whichever action is ordered by the committee.

(2) If a building is to be demolished, section 72-810 shall not apply, but the state building division shall notify the State Historic Preservation Officer of such demolition at least thirty days prior to the beginning of the demolition or disassembly so that the officer may collect any photographic or other evidence he or she may find of historic value.

(3)(a) If a building or land is to be sold or leased, the state building division shall cause an appraisal to be made of the building or land. The sale, lease, or other disposal of the building or land shall comply with all relevant statutes pertaining to the sale or lease of surplus state property, except that if the state

building division fails to receive an offer from a state agency in which the agency certifies that it (i) intends to use the building for the purposes for which it was designed, intended, or remodeled or to remodel the building for uses which will serve the agency's purposes or (ii) intends to use the land for the purposes for which it was acquired or received, the state building division shall then notify the Department of Economic Development that the building or land is available for sale or lease so that the department may refer to the state building division any potential buyers or lessees of which the department may be aware. The state building division may then sell or lease the building or land by such method as is to the best advantage of the State of Nebraska, including auction, sealed bid, or public sale and, if necessary, by private sale, but in all situations only after notice of the property sale is publicly advertised on at least two separate occasions in the newspaper with the largest circulation in the county where the surplus property is located and not less than thirty days prior to the sale of the property. The state building division may use the services of a real estate broker licensed under the Nebraska Real Estate License Act. Priority shall be given to other political subdivisions of state government, then to persons contracting with the state or political subdivisions of the state who will use the building or land for middle-income or low-income rental housing for at least fifteen years, and finally to referrals from the Department of Economic Development.

(b) When a building or land designated for sale is listed in the National Register of Historic Places, the state building division, in its discretion and based on the best interests of the state, may follow the procedure outlined in subdivision (3)(a) of this section or may sell the building or land by any method deemed in the best interests of the state to a not-for-profit community organization that intends to maintain the historic and cultural integrity of the building or land.

(c) All sales and leases shall be in the name of the State of Nebraska. The state building division may provide that a deed of sale include restrictions on the building or land to ensure that the use and appearance of the building or land remain compatible with any adjacent state-owned property.

(d) Except as otherwise provided in subsection (4) of this section, the proceeds of the sale or lease shall be remitted to the State Treasurer for credit to the Vacant Building and Excess Land Cash Fund unless the state agency formerly responsible for the building or land certifies to the state building division that the building or land was purchased in part or in total from cash, federal, or revolving funds, in which event, after the costs of selling or leasing the building or land are deducted from the proceeds of the sale or lease and such amount is credited to the fund, the remaining proceeds of the sale or lease shall be credited to the cash, federal, or revolving fund in the percentage used in originally purchasing the building or land.

(4) Any state-owned military property, including any armories considered surplus property, shall be sold by such method as is to the best advantage of the State of Nebraska, including auction, sealed bid, or public sale, and if necessary, by private sale, but in all situations only after notice of the property sale is publicly advertised on at least two separate occasions in the newspaper with the largest circulation in the county where the surplus property is located and not less than thirty days prior to the sale of the property, and pursuant to section 72-816, all proceeds from the sale of the property, less maintenance expenses pending the sale and selling expenses, but including investment income on the sale proceeds of the property, shall be promptly transferred from the Vacant Building and Excess Land Cash Fund to the General Fund by the State Building Administrator.

(5) The state building division shall be responsible for the maintenance of the building or land if maintenance is ordered by the committee and shall be responsible for maintenance of the building or land pending sale or lease of the building or land.

(6) Land at the Hastings Regional Center determined by the committee to be excess shall be sold by such method as is to the best advantage of the State of Nebraska, including auction, sealed bid, or public sale and, if necessary, by private sale. The sale of land shall only occur after notice of the sale is publicly advertised on at least two separate occasions in the newspaper with the largest circulation in the county where the land is located and not less than thirty days prior to the sale of the land. The proceeds from the sale of the land, less maintenance expenses pending the sale and selling expenses, but including investment income on the sale proceeds, shall be promptly transferred from the Vacant Building and Excess Land Cash Fund by the State Treasurer as follows:

(a) First, not exceeding five million three hundred seven thousand dollars to the General Fund; and

(b) Second, not exceeding three million dollars of available proceeds remaining to the Nebraska Capital Construction Fund.
